CAREER OBJECTIVE

Passionate Front-End Engineer with 5+ years of experience using JavaScript, HTML5 and CSS3 to build great experiences for users on the web. Specializes in building dashboards and monitoring solutions using modular, well-tested React.js (including hooks), Angular (1, 2) and Vue.js components.

PROFESSIONAL EXPERIENCE

ScaleGrid Inc.   **Bangalore, Karnataka**
Senior Front-End Engineer   *June 2016 – July 2019*

- Develop interactive data intensive dashboards that allow users to create or import their database clusters
- Design a responsive monitoring dashboard from scratch using React.js and Highcharts that led to 20% faster page loads
- Migrate legacy jQuery codebase gradually to a mix of RequireJS modules and React.js
- Work on an internal Support tool built using Vue.js for admin purposes
- Introduce asset automation using the Grunt/Gulp build system with migration to Webpack 4
- Work with designers to build a responsive marketing website from Photoshop/Sketch mockups using the Hugo static site generator
- Redesign the WordPress theme from scratch for a better blog editing and reading experience
- Create accessible HTML5 email templates and test them using Litmus and Mailchimp

Viraltag Inc.   **Bangalore, Karnataka**
Front-End Engineer   *May 2015 – May 2016*

- Introduce a new product from scratch called TapIt that offers embeddable User Generated Galleries
- Build a Chrome Extension from scratch to schedule images from any web page to Viraltag
- Develop the Viraltag iOS application using Ionic (Angular), PhoneGap and Cordova
- Collaborate with designers to improve the social media scheduling UX using InVision and Photoshop mockups that increased user interaction by over 15%
- Build reusable, modular components using Backbone.js

EDUCATION

Birla Institute of Technology & Science, Pilani   **Dubai, UAE**
Masters in Engineering, Software Systems (June 2013)
