Work Experience

CircleCI *Senior Frontend Engineer (Feb 2021 – present)*
- Currently working on building out the design system for the company that includes UI Components, shared datastores etc.

HomeX *Senior Frontend Engineer (Nov 2019 – Feb 2021)*
- Worked on performance for homex.com and building the component library for use across multiple projects
- Lead an API initiative that talks to multiple external sources, converts them into required domain models for any client
- Create and maintain a centralized repository (npm package) for all icons in HomeX

ScaleGrid *Frontend Engineer (Jun 2016 – July 2019)*
- Develop interactive data intensive dashboards that allow users to create/import their database clusters
- Migrate legacy jQuery spaghetti code to a CommonJS module system
- Work with designers / marketers to build the company site using Hugo
- Redesign the blog WordPress theme for a better editing and reading experience

Viraltag *Frontend Engineer (May 2015 – May 2016)*
- Introduce a new product called TapIt that offers embeddable User Generated Galleries
- Build a chrome extension to schedule images from any web page to Viraltag, especially Pinterest
- Develop the company's iOS application using Ionic

Education
Master of Engineering in Software Systems, BITS Pilani Dubai Campus (2013)
CGPA: 4.2 / 5
