FRONTEND DEVELOPER (UI/UX)

I build great experiences for users on the web using latest Web Technologies like HTML5, Sass, VueJS, AngularJS, Backbone and build-tools like Grunt, Gulp and Webpack. I believe the key to good Front-End Development is a combination of Good Design & Engineering that promises the user an organic experience on the platform.

EMPLOYMENT

Product Lead – UI   **ScaleGrid Inc.**   **June 2016 – Present**

Console Dashboard
- ❏ Create UI Modules for CRUD operations on MongoDB/Redis Clusters that can be deployed on AWS, DigitalOcean etc
- ❏ Build Scheduled and On-Demand Backup & Restore with Snapshots
- ❏ Develop a Jobs Queue for various Cluster Level Actions like Refresh, Backup Peeks, Agent Upgrades, IP Whitelists etc.

Monitoring Dashboard
- ❏ Create beautiful & responsive charts for showing Machine States/Cluster Info using HighCharts & Sparklines
- ❏ Interactive Monthly Reports sent via Email

Blog/Marketing
- ❏ Redesign, Build & Maintain a WordPress theme for the ScaleGrid Blog
- ❏ Redesign, Build & Maintain a responsive marketing website using Hugo
- ❏ Write 1 Blog Post per month + Answer Questions on Quora/LinkedIn/Twitter
