CAREER OBJECTIVE

Passionate Front-End Engineer with 4+ years of experience using JavaScript, HTML5 and CSS3 to build great experiences for users on the web. Specializes in React, Angular and Vue to build dashboards and monitoring solutions.

PROFESSIONAL EXPERIENCE

ScaleGrid Inc.   **Bangalore, Karnataka**
Senior Front-End Engineer   *June 2016 – July 2019*

- Develop interactive data intensive dashboards that allow users to create or import their database clusters
- Migrate legacy jQuery codebase to RequireJS modules
- Improve developer productivity by introducing a Grunt/Gulp build system
- Design a responsive monitoring dashboard using Highcharts that led to 20% faster page loads
- Redesign the WordPress blog theme to include responsiveness and a better reading experience
- Build a responsive marketing website using the Hugo static site generator that improved SEO
- Create and test HTML email templates using Litmus and Mailchimp

Viraltag Inc.   **Bangalore, Karnataka**
Front-End Engineer   *June 2011 – August 2015*

- Build a Chrome Extension to schedule images from any web page to the Viraltag service
- Develop the Viraltag iOS application using Ionic, PhoneGap and Cordova
- Redesign the social media scheduling experience that increased user interaction by over 15%
- Introduce a new product called TapIt that offers embeddable User Generated Galleries (UGC)
- Connect your E-Commerce store to your Instagram feed for direct product purchases
